

Laser Therapy and Your Pet

What will laser therapy do for my pet?

Laser therapy provides a sterile, pain-free, surgery-free, drug-free treatment, which is used to treat a variety of injuries, wounds, fractures, neurological conditions, numerous dermatological problems, and pain. Whether your pet is rehabilitating from trauma or injury, healing from wounds, or simply aging, your companion will benefit from this revolutionary new approach to Veterinary medicine.

What to expect during a laser therapy treatment session for your companion?

Simply put, it provides relief.

As the laser is administered, your pet will relax and enjoy, much like you, experiencing a good massage. The almost immediate relief of pain will allow your pet to be comfortable and any anxiety that your pet initially experienced will dissipate.
